

Forest School Session Evaluation – Session 3

Reflection and evaluation

- The children started happily and enjoyed making a den for Supertato
- They got cold and lost interest in activities
- The 'run and find' game helped a little
- FS leader spent too much time supervising the potty
- Other staff were not enthused in session

The children learned:

- how to use items to make a den
- to look for specific properties of items

I learned:

- to delegate tasks such as the potty so I can manage the session better
- to provide activities for staff to do and give them a choice of which one they want to lead to motivate them

Ideas for next time:

- See above
- look at colours as this is the aspect the children found hard

Add to risk assessment:
